The studies described in this thesis were carried out at the Department of Medical Physiology, University Medical Center Groningen, University of Groningen, the Netherlands. The work was supported by the University of Groningen and the research and graduate school for Behavioural and Cognitive Neurosciences and was subsidized by Solvay Pharmaceuticals, Weesp, the Netherlands. Additional funding was obtained from the de Cock Stichting.

Printing of this thesis was financially supported by the following organizations:

Research and Graduate School for Behavioural and Cognitive Neurosciences (BCN)

University of Groningen

Solvay Pharmaceuticals

Faculty of Medical Sciences

Peprtech (UK)

Biorad Laboratories

Harlan

Leica Microsystems

Printed by Facilitair Bedrijf, University of Groningen

## Table of Content

• Chapter 1: Introduction	<b>P 7</b>
• Chapter 2: Vesicle-mediated transport and release of CCL21 in endangered neurons: a possible explanation for microglia activation remote from a primary lesion	<b>P 39</b>
• Chapter 3: Expression, sorting and transport of neuronal CCL21 in large- dense core vesicles	<b>P 69</b>
• Chapter 4: Constitutive expression of CXCL10 in cultured cortical neurons	<b>P 91</b>
• Chapter 5: CXCL4 expression in microglia <i>in vitro</i> and <i>in vivo</i> and its signaling through CXCR3	<b>P 111</b>
• Chapter 6: Discussion	<b>P 131</b>
• Chapter 7: Nederlandse Samenvatting + uitleg voor de leek	<b>P 145</b>
• Dankwoord	<b>P 151</b>
